

TRADITIONAL PROGRESSIVE TRENDS

Portfolio that Adjusts to Economic and Financial Conditions

Q2'2026 Fact Sheet

Portfolio Objective: Conservative

As of June 30, 2026

Strategy Description

The Progressive Trends investment strategy from Creative Financial Designs, Inc. is designed to give the client a portfolio that uses investments that adjust to economic and financial conditions. Five portfolio objectives are available within the strategy. Within those five portfolio objectives, the equity portion of each use predominately investments that change with the overall market conditions. Some of these investments will move to other asset types or even possibly go out of the equity markets. Each of the internal investment managers and teams determine their risk and exposure. The fixed investments of the portfolio are diversified within asset types and classes to further diversify the selected portfolio. Candidate investments are screened and selected based on the potential value they add to the portfolio. In a given portfolio, approximately 10 to 15 mutual funds and ETFs are employed to achieve the Strategy objectives. The actual number varies by investment objective and is based on asset class exposure.

Portfolio objective options include : Conservative, Moderately Conservative, Moderate, Moderately Aggressive, Aggressive

Disclosures

Investment Risk – All investments entail risk, and these risks could result in the loss of some or all of your investment. There is no guarantee of returns. Past performance is not an indication of future results.

Model Portfolios – Portfolios are allocated pursuant to models determined by Creative Financial Designs, Inc., (Creative) which is solely responsible for the content of each model, and the selection of specific investments. Creative has discretion to change the models at any time, and might make changes to the models for any reason, including current or anticipated market conditions. Any references to percentages of assets in a model portfolio are subject to the discretion of the management team, and are subject to change at any time, without notice.

Variances Among Accounts – Each investment model is merely a guideline, and there may be variance between investment holdings, and therefore returns, in any particular account versus the model allocation. In some instances, these differences may be material. Additionally, there may be some differing holdings among customers investing in the same investment model portfolio. Some of these differing holdings are the result of limited investment options, such as would be the case in self-directed retirement accounts, and/or managed variable annuity accounts. Additional variances could arise due to such things as, without limitation: •Programmed reallocations by an issuer, pursuant to particular product terms and conditions •Special reallocation requests by the client •Timing issues, e.g. investors purchase a fund that subsequently is no longer available for new purchasers, so later investors invest in a comparable (though not identical) investment •size of an investment account •Additional strategic options selected by a client, e.g. a client uses the invest over time option or the optional cash allocation •Additional contributions to an account, or withdrawals from an account •Additional charges or restrictions that may make a reallocation disadvantageous to a particular client •Tax implications applicable to an individual investment or account •Opening of new investments •Minimum investment amounts applicable to investments •Management fee and other fees charged to the client •Choice of product, custodian, platform, broker/dealer, or other third-party service providers, etc.

Client Choices Influencing Returns in the Account – Please note that your choices as a client may influence the returns in your account, and may not mirror returns of holdings of other investors in the same model portfolio. Some of your choices that may affect the account include: •Making additional contributions to your account •Making distributions from your account •Putting special restrictions on your account, either to hold a particular security, to avoid a particular security, to hold additional cash, etc. •Management fee and other fees charged to the client •Choice of product, custodian, platform, broker/dealer, or other third-party service providers, etc.

Investment Options Subject to Portfolio Selection Criteria – Selection criteria of individual investments is subject to the limitations set forth in the particular strategy objectives. The firm attempts to diversify investment portfolios subject to the selection criteria for the particular strategy. Descriptions of investment strategies are set forth in the firm's ADV and other applicable disclosures.

The **Blended Benchmark** is a weighted custom composite consisting **80% Bloomberg U.S. Aggregate Bond Index / 20% MSCI ACWI Index (USD)**. The **MSCI ACWI Index (USD)** captures large and mid cap companies across 23 developed markets and 24 emerging markets countries with coverage of ~85% of the global investable equity opportunity set. The **Bloomberg U.S. Aggregate Bond Index** is a market-value-weighted index of fixed-rate, publicly-placed, USD denominated, and non-convertible investment grade debt issues with at least \$250 million par amount outstanding and at least one year to final maturity. It is not possible to invest directly in an index.

Composite returns reflect the reinvestment of income and capital gains and are calculated and stated in USD, and periods over one year are annualized. Gross of fees performance does not include trading costs, management fees, or other expenses that would be incurred by a participant portfolio, but does reflect the expenses of any underlying fund and ETF investments. Net of fees performance reflects deduction of the maximum annual management fee of 2%. Management fees can range from 0.20% to 2.00% and are based on client and adviser agreement.
